

World Mineral Resources Participações S.A.

March 2012

The Company

- World Mineral Resources Participações S.A. (WMR) was incorporated in December 2010 with the purpose of identifying World Class mineral deposits throughout the Brazilian territory
- Initially, WMR is focusing on projects in the States of Bahia, Minas Gerais, Goiás and Tocantins
- WMR targets the most globally demanded mineral commodities, in particular:
 - Iron ore and other steel industry metals (Fe, Mn and Cr)
 - Base metals (Al, Cu and Ni)
 - Rare earths (Nd, Ce, La and y) and
 - Fertilizers (S, K and P)

The Company

- WMR offices are conveniently located in São Paulo (Brazilian financial centre) and Belo Horizonte (Brazilian mining centre)
- Development of partnerships with universities and technology centres, including CETEM, Gorceix Foundation and others
- Commitment to develop prospecting and exploration activities under rational and advanced methods, to reduce costs and timing of the projects
- Mineral reports to be audited in accordance with international standards NI 43-101 or JORC

Our team

Joao Carlos
Cavalcanti
JC

Chairman and CEO

Geologist and mining engineer with over 40 years of experience in the mining sector. Direct responsible for the finding of some of the most relevant world class deposits in Brazil, including, among others:

BAMIM (ENRC) – Bahia - Fe (Reserves - JORC 600 Mt, Substance: Pellet Feed 20 Mtpa, Investments: US\$ 3.5 billions).

Minas Gerais (VNN/Honbridge) – Fe (Reserves - JORC 2.8 Bt., Substance: Pellet Feed 25 Mtpa., Investments: US\$ 4.9 billions)

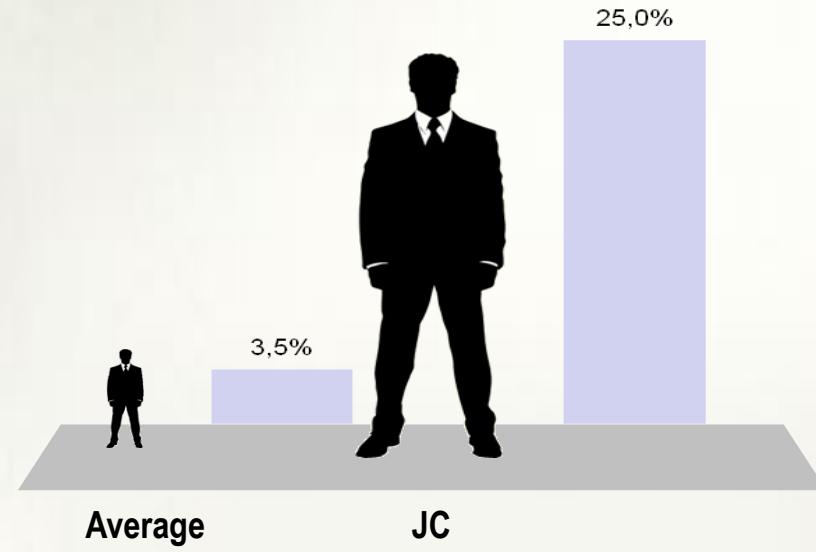

Planalto Piauí (BEMISA) – Fe (Reserves – JORC 700 Mt., Substance: Pellet Feed 15 Mtpa., Investments: US\$ 2.5 billions)

Níquel Tocantins (Base Metals/VNN) – Ni (Reserves: 145 million/tons. Content 0.85% Ni. Investments: US\$ 300 millions)

Our team

GEOLOGISTS

WMR has a strong team of geologists with vast experience in the Brazilian mineral sector

Orlando Rocha
Director and
Chief Geologist

Geologist with **over 20 years experience in the mineral sector**. Orlando has worked at Vale S.A., Anglo Gold. He has a great experience in the exploration of iron ore, REE, gold, and copper.

Gomes has **38 years experience in the mineral sector** and has worked in particular with iron ore, gold, industrial minerals and limestone projects.

Gomes has worked at SAM, CBPM and Oderbrecht.

Amilcar Nascimento
Senior Geologist

Amilcar has **27 years experience in the mineral sector** and has worked in particular with iron, gold and cassiterite projects. Amilcar has worked at Base Metals and VNN Votorantim

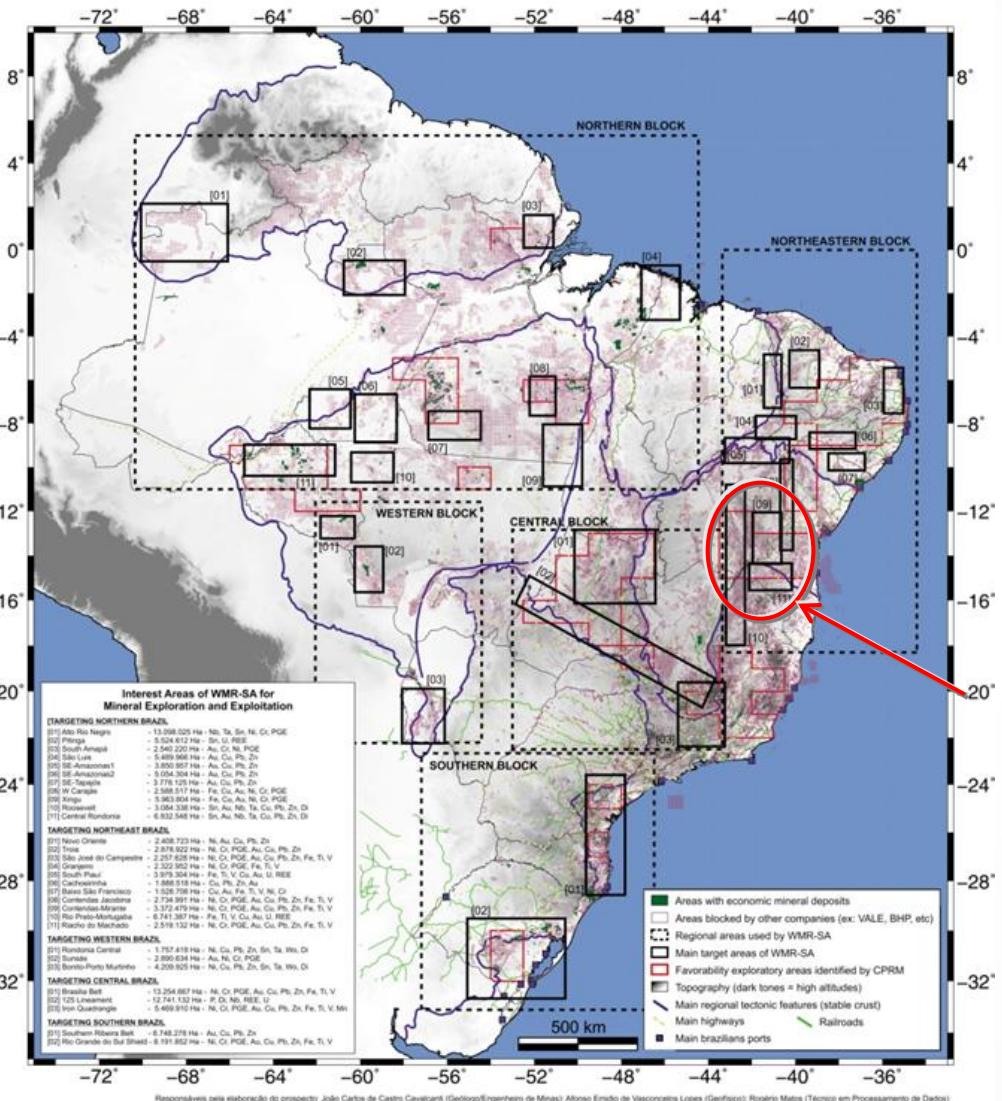

Nilo Vargas
Senior Geologist

Nilo has **30 years experience in the mineral sector** and has worked in particular with copper, nickel, gold and manganese projects. Nilo has worked at Kinross, CPRM e CBPM

Objectives & Values

- **Corporate Ethics:**
 - best practices
 - transparency
- **Commitment to Investors:**
 - providing periodic reports to investors
 - adoption of international standards
- **Commitment to Community:**
 - open dialogue with affected communities
 - use of local workers
 - improving infrastructure
- **Health, Safety and Environment policies**

Exploration strategy

Selected blocks:

- 5 blocks with high geological potential;
- 28 projects distributed in the 5 blocks;
- Geophysical and geological investigations.

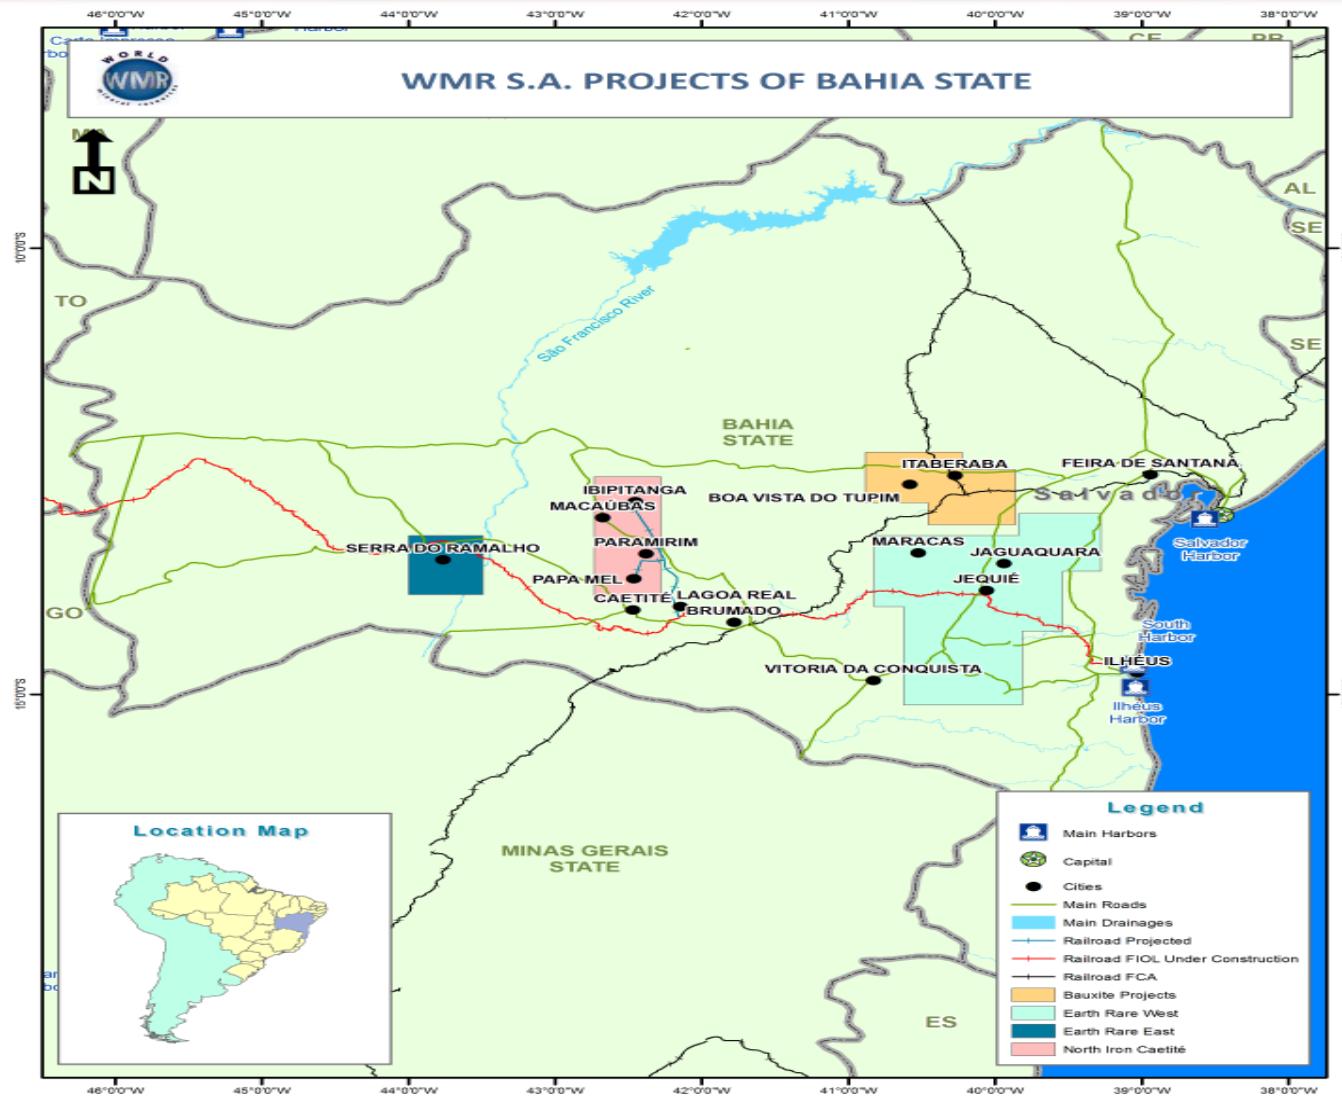

Other aspects to be considered:

- Analysis of the logistics infrastructure;
- Analysis of the technology and communication infrastructure;
- Preliminary blocks: Central and North-eastern.

Why North-eastern and Central Blocks (Bahia State)?

- High quality geological maps and geophysics (CPRM/CBPM);
- Logistics and Infrastructure in development;
- Government support.

WMR Bahia Projects – Location:

Iron ore Project - Caetité Norte

WMR S.A.	
Iron Ore - Caetité Norte	
Exploration permits	36 areas, covering an area of approximately 50,000 hectares
Estimates	1,2 billion/ ton@ Fe 35% to 40% (100% potential, no resources measured, indicated or inferred)
Target	600 million/ ton. @ Fe 35% to 40% (30% indicated + 70% inferred)
Current phase	Geological Mapping (60%); Ground geophysics (60%); topography(60%); Characterization of Ore (50%); Drilling(0%)
Next steps	Geological Mapping (40 mil hectares); Ground geophysics (300Km); topography (300Km); Drilling (12.000m approx.); Characterization of drilling (01)
% Project Execution and Expected	30% . Scheduled for completion: June 2013

Project Caetité Norte – Preliminary Characterization Essays

- Tests were made in 3 samples (200 Kg each) of the targets Ibibitanga, Macaúbas and Papa Mel at the NOMOS Laboratory (Rio de Janeiro).

CHEMICAL ANALYSIS OF HEAD SAMPLES	
TARGET	%Fe
Ibibitanga	39.73
Macaúbas	31.83
Papa Mel	46.50

- Characterization essays made:
 - I. Granular chemical analysis X Release rating;
 - II. Concentrating tests with thick sinter feed, thin sinter feed and pellet feed products;
 - III. Friability and Concentrating Tests.

Project Caetité Norte – Process Route

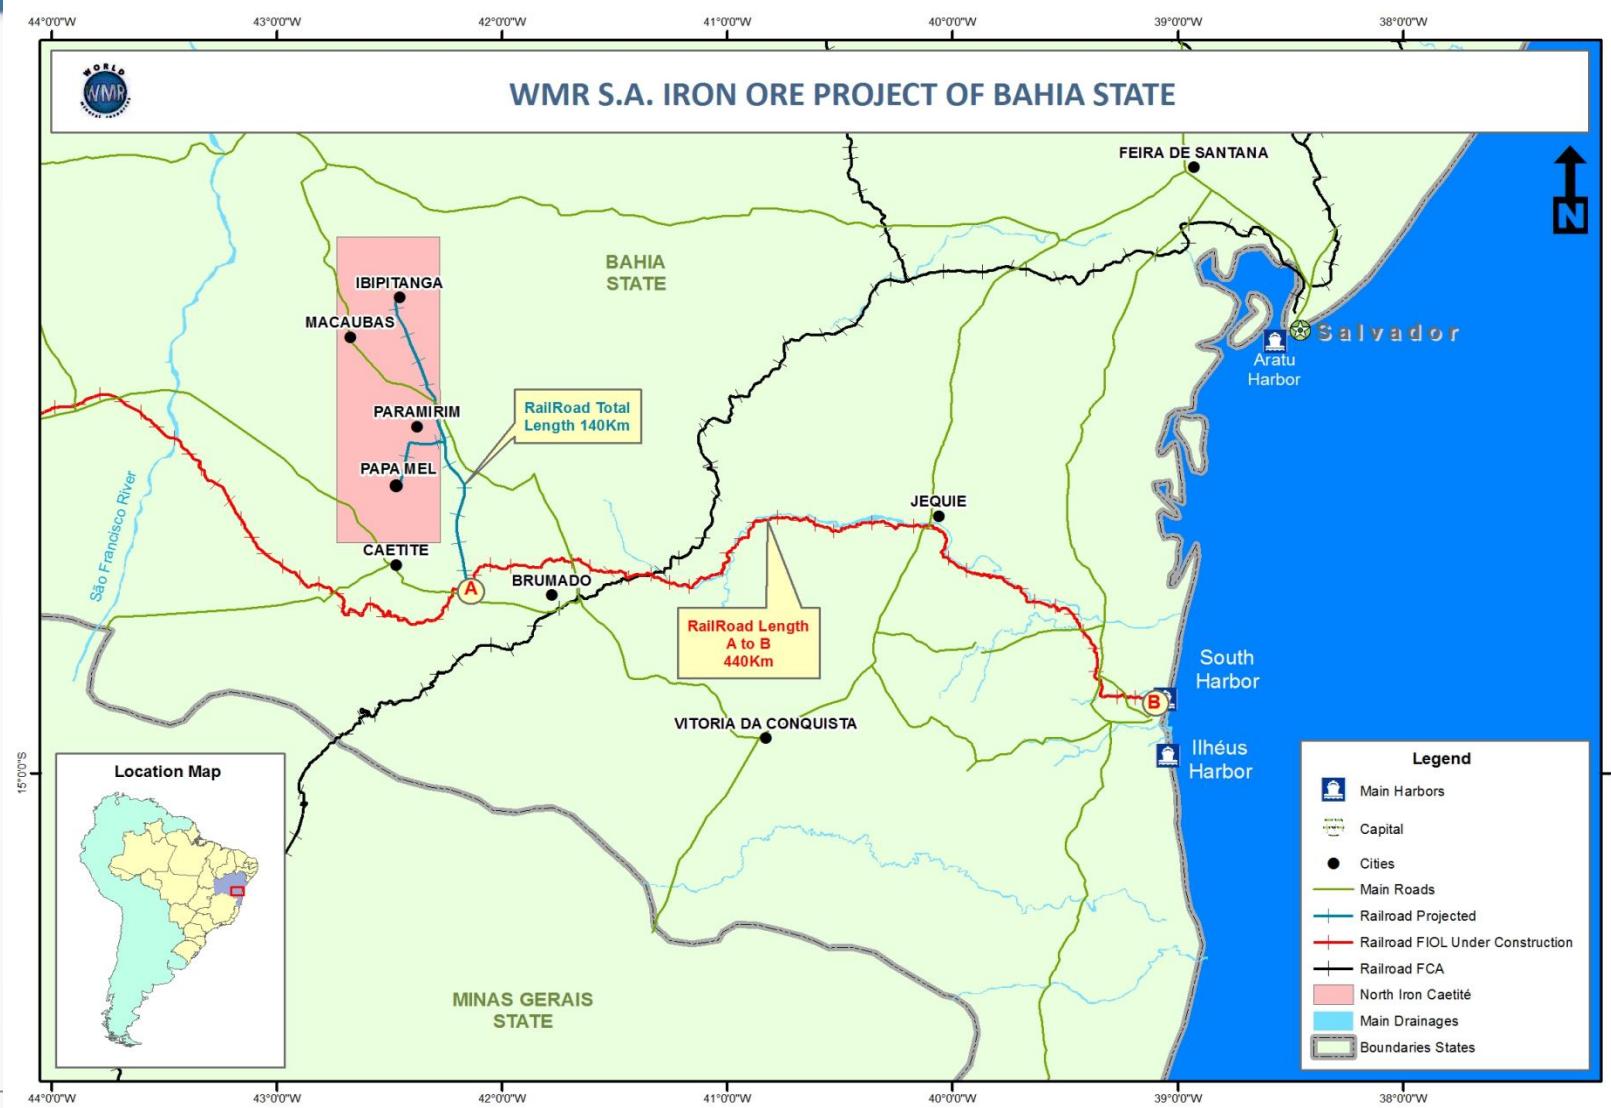

Project Caetité Norte – Product: pellet feed

(magnetic separation only)

Iron ore recovery (100# x Magnetic Intensity)

	% Mass recovery	% Fe	Magnetic intensity (gauss)
Ibipitanga	34.24	63.49	1000 to 2000
Macaúbas	36.07	65.35	1000 to 16000
Papa Mel	51.15	65.75	
Average estimate	40.49	64.86	

Iron Ore Project - LOGISTICS

Rare Earths Project – East

WMR S.A.	
Rare Earths East - Jequié - Maracás	
Exploration permits	76 exploration permits, covering an area of approximately 121,000 hectares
Estimates	Not available. REE grades of 0.60%.
Target	40 million/ ton. @ REE 0,40% (30% indicated + 70% inferred)
Current phase	Selected targets already identified. Geological Mapping(10%); Sampling (10%);
Next steps	Geological Mapping; Drilling; Chemical analysis; Topography; Characterization of Ore
% Project Execution and Expected	5% . Scheduled for completion: January 2014
